Educating Architects – Four courses by Kenneth Frampton

The archive of architectural historian and critic Kenneth Frampton was recently received by the Canadian Centre for Architecture. As a first step in providing access to this body of work, this exhibition asks how an archive of history, theory, and criticism can inform our understanding of architectural practice today. Structured around the syllabi from four core courses in history, theory, and design, the exhibition illustrates Frampton's multi-generational impact on the landscape of architecture education. Encompassing drawings, models, photographs, proposals, papers, lectures, slide shows, essays, monographs, letters, and autobiographical documents, the exhibition highlights how his pedagogical methods and concerns were instrumental in shaping the discipline and profession of architecture internationally. Frampton's extensive archive at the CCA is comprised of (un)published essays, book manuscripts, illustrations, photographic prints, and sketches. It also includes annotated drawings from the influential 1965 publication of Pierre Chareau's and Bernard Bijvoet's *Maison de Verre*. With the arrival of this archive, the CCA continues to enrich a collection that supports historiographic research. The CCA also holds the archives of the Institute for Architecture and Urban Studies (IAUS), in which Frampton was heavily involved, as well as part of the archive of Alvaro Siza, about whom Frampton has frequently written. Jean Louis Cohen, Sheldon H. Solow Chair for the History of Architecture at the Institute of Fine Arts, New York University commented on the relevance of Frampton's archive: "All these domains in Frampton's dense

activity of more than five decades have yielded multiple types of documents, all present in the collection: written works by him, correspondence with colleagues and architects, photographic prints, slides, audio tapes, ephemera of all sorts – leaflets, brochures and posters. At the CCA, it complements happily the archives of Cedric Price, James Stirling, and Peter Eisenman, providing resources for the study of both Europe and the United States between 1960 and the present." The exhibition, using a biographical and historiographic approach, tells the story of Frampton's teaching at various academic institutions and his development as an educator who, in his call for deceleration, has always re-valued architectural works. Since the academy was the dominant setting for Frampton's career and intellectual life, the exhibition begins with his move to the United States where he assumed a teaching position at Princeton University in 1965. In the context of education reform in US architecture schools in the 1970s, Frampton was integral in transforming the curriculum of Columbia University's Graduate School of Architecture & Planning. In particular, he designed and taught what became three-core-courses: the theory seminar 'Comparative Critical Analysis', the history lectures 'Thresholds of Modern Architecture', and the housing studio unit on the 'Perimeter Block'. In the 1990s, he started teaching 'Studies in Tectonic Culture', which also became a long-standing history and theory course.

The exhibition is on display at the Octagonal Gallery, CCA, Montreal, until September 30, 2017. cca.qc.ca

New range of sofas by Plüsch

Founded by Hemendra and Rati Sharma in 1988 as SIS Imports, Plüsch incorporates a new energy and a compelling promise in the domain of luxury living. The brand started bringing the best German luxury products to India. The Plüsch range of sofas is designed into large, small, round, rectangular, black, white, and wood – always with a delicate metal frame. An important feature of the sofa is the back extension which increases the height of the armrest and proves Plüsch to be a great retreat. This architectural

piece of furniture owes its easily combined, ingenious multi-functionality and grandeur to the Italian designers Metrick. The Plüsch collection is available at all Plüsch showrooms in Delhi, Bengaluru, Mumbai, and Hyderabad. The legs of the sofa are available in black chrome as illustrated, glossy chrome, and in a lacquered finish. The sofas are refined and upholstered meticulously in order to attain the perfect symbiosis of versatility and comfort.

TERRA faucets by GRAFF

Headquartered in Milwaukee, Wisconsin, USA, with locations across Europe, GRAFF is globally recognised for its trendsetting products and unique vision. Supported since 1922 by extensive plumbing and hardware manufacturing experience, GRAFF has positioned itself at the forefront of design, creating bathroom and kitchen fixtures for the luxury market. Utilising the latest manufacturing technology and thanks to a tradition of old-world craftsmanship, GRAFF's commitment to creating cutting-edge, and premium-quality collections is evident in each and every product. GRAFF employs over 1000 dedicated professionals and has complete control over the production process, making it a truly vertically-integrated manufacturer. The new collection of faucets, TERRA,

offers modern solutions that are ecologically sound and in sync with technological progress. Designed by GRAFF Design Studio, TERRA is a collection with several pieces and accessories. The series is available in a number of finishes: polished chrome, brushed nickel, matte black, and matte white. Even in the casting, finishing, and galvanic treatments, GRAFF adopts a zero-discharge system that recycles 100 per cent of brass and paper. In line with its strong commitment to environmental sustainability, the collection is one of the most sustainable by GRAFF. It is manufactured in solid brass with a minimum level of nickel and lead and a five-year warranty.
